

TIJWUN CARE AND EMPOWERMENT FOUNDATION

Annual Report 2025

Corrected public edition · accountable reporting, clear programme architecture and verified reach

ISSUED 2 SEPTEMBER 2026

EXECUTIVE OVERVIEW

A credible record of community delivery

TIJCEF works with women, adolescent girls and young people through four connected programme areas. This corrected edition aligns the report with the organisation's approved public figures and current programme framework.

3,500+	1,200+	4	3
CUMULATIVE PEOPLE REACHED	PEOPLE REACHED IN 2026	PROGRAMME AREAS	STATES WITH RECORDED ACTIVITIES

Correction notice

An earlier edition contained an unreconciled cumulative reach figure and retired programme labels. Those claims have been withdrawn. The approved organisation-wide public figures as at August 2026 are 3,500+ cumulative people reached and 1,200+ people reached in 2026. The latter is a post-reporting-period update and is not presented as a 2025 result.

Purpose and reporting boundary

This is a public narrative report. It describes TIJCEF's direction, accountability approach and evidence available for partner assessment. It does not substitute for project-specific monitoring records, partner reports or audited financial statements. Eligible funders may request proportionate due-diligence materials directly from TIJCEF.

Our mission

To advance the health, knowledge, leadership and resilience of underserved women and young people through community-led programmes, practical partnerships and evidence-informed advocacy.

PROGRAMME FRAMEWORK

Four values. Four clear areas of work.

Dignity, Agency, Resilience and Evidence remain TIJCEF's organising pillars. Each is now paired with a plain-language programme area so communities, donors and implementation partners can understand the work without interpretation.

PILLAR	PROGRAMME AREA	WHAT TIJCEF DOES
Dignity	Health, Menstrual Dignity & WASH	Menstrual health education, dignity support, health awareness, school and community WASH engagement.
Agency	Education, Skills & Leadership	Youth and women leadership, entrepreneurship, mentoring, school engagement and volunteer development.
Resilience	Climate Action & Stronger Communities	Community sanitation, environmental awareness, local climate action and practical resilience building.
Evidence	Research, Learning & Advocacy	Needs assessment, monitoring, learning products, responsible public reporting and evidence-informed advocacy.

Geographic scope

TIJCEF is based in Jalingo, Taraba State, and has recorded programme activity in Adamawa, Katsina and Taraba States. Public language distinguishes this documented footprint from claims of nationwide delivery.

DELIVERY EVIDENCE

Verified programme snapshots from 2026

The following activities are included because TIJCEF has confirmed their location, timing and participation figures through programme or partner records. Counts describe recorded engagement; they are not automatically equivalent to sustained outcomes.

ACTIVITY	TIME	REPORTED REACH	DELIVERY
Government Girls College, Yola	February 2026	Approximately 400 girls	Menstrual health education and dignity support through school-based outreach.
Adroit International Academy, Yola	2026	200 girls	Menstrual empowerment delivered with Lead the Girl Foundation.
Youth Empowerment Seminar, Girei LGA	2026	50 young people	Entrepreneurship, self-reliance and leadership sessions at Zion Centre.
Women's Leadership Empowerment, Taraba	2026	45 women	Leadership, participation and agency-focused engagement.
Volunteer Training, Yola	April 2026	Attendance record held	Preparation for responsible delivery, community engagement and safeguarding.
School Takeover	Twice-yearly model	Programme records by cycle	A full-day school engagement led by TIJCEF staff and volunteers.

Earlier confirmed activity

In 2023, TIJCEF's Executive Director visited an orphanage in Katsina and donated gifts to children. The activity is retained as a documented historical programme snapshot, without adding an unsupported beneficiary count.

EVIDENCE AND LEARNING

How TIJCEF moves from activity to outcome

TIJCEF uses a proportionate results chain. Each project should define indicators before delivery, collect only necessary data, review quality and use findings to improve the next cycle.

1. Inputs	People, partner contributions, approved budgets and materials.
2. Activities	Sessions, outreach, training, service days and research tasks.
3. Outputs	Attendance, completion, materials distributed and evidence produced.
4. Outcomes	Changes in knowledge, confidence, practice or capacity, measured where feasible.

Public reporting standards

- Separate cumulative reach, annual reach, activity attendance and longer-term outcome measures.
- State the source and reporting period for every headline figure.
- Avoid double-counting repeat participants where individual-level deduplication is not available.
- Protect children and vulnerable people through consent, safe imagery and data minimisation.
- Correct public inconsistencies openly rather than carrying them into future proposals.

ACCOUNTABILITY

Governance, safeguarding and stewardship

Credibility is demonstrated through systems, not slogans. TIJCEF's public commitments define the minimum controls expected across programmes and partnerships.

Governance

Named leadership and programme responsibilities; documented approvals; conflict-of-interest disclosure; proportionate partner due diligence.

Safeguarding & PSEA

Code of conduct, safe recruitment and induction, consent, confidential reporting and survivor-centred response pathways.

Financial stewardship

Approved budgets, supporting documentation, restricted-fund tracking, reconciliations and donor reporting tied to grant conditions.

Feedback & complaints

Accessible channels for communities, volunteers, partners and donors, with confidentiality and non-retaliation commitments.

Responsible communications

No invented impact, no unsupported partnerships and no use of vulnerable people's stories without appropriate consent.

Financial disclosure

This public narrative report does not present audited financial statements. Detailed budgets, banking confirmation, registration evidence, policies and supporting records may be shared directly with eligible partners under proportionate due-diligence and confidentiality arrangements.

PARTNERSHIP PRIORITIES

Where aligned support can add value

TIJCEF welcomes funders and technical partners whose objectives align with documented community needs and who value safeguarding, learning and transparent reporting.

Health, dignity and WASH

School and community menstrual health, dignity support and practical WASH engagement.

Education and leadership

Structured youth and women's leadership, entrepreneurship, mentoring and school-based programmes.

Community resilience

Locally led sanitation, environmental awareness and climate resilience initiatives.

Evidence systems

Baseline tools, monitoring systems, outcome measurement, learning products and responsible advocacy.

Institutional strengthening

Safeguarding, governance, finance, volunteer management and digital evidence infrastructure.

Partner next step

Prospective partners can begin at www.tijcef.org/transparency, then contact info@tijcef.org to request a programme concept, budget, due-diligence pack or safeguarding discussion relevant to the proposed collaboration.

Evidence base used for this edition

- TIJCEF approved programme framework and public impact figures, reviewed August 2026.
- Confirmed 2023 and 2026 activity records supplied for public website reporting.
- TIJCEF public governance, safeguarding, complaints, donation and privacy commitments.
- Verified external media links and the United Nations SDG partnership listing included in the TIJCEF media tracker.

Document control

Corrected edition issued 2 September 2026. Supersedes the earlier public PDF. Future editions should retain a version date, evidence owner and approval record before publication.
